

Reference sheet

C-52 and CX-52 slide bars

The drawing below shows four slide bars of which all cams are identical. It can be used to quickly identify the cams of a slide bar. It is advised to print this page at 100% and laminate it. The red background shows the space that is taken by each of the six pin-wheels, whilst the darker red vertical lines mark the position of the support discs inside the bar drum (cage).
