

New look for Audiotel International

2013 is going to be an exciting year. We have all been working extremely hard behind the scenes in preparation, with plans to raise the profile of Audiotel early 2013, supported by a newly designed website, improved product brochures and exciting new products to bring to market.

The last 2 years have seen a transformation in Audiotel's position in the market place. We are strengthening our product range to ensure we remain a key player in our traditional Counter Surveillance and Surveillance market, as well as developing opportunities in growing markets such as Counter Terrorism and Intellectual Property protection.

Audiotel International has moved

After nearly 20 years at Audiotel International's Weldon Road head office, we are proud to announce our relocation to our new state-of-the-art design, development and manufacturing facility just 2 miles away in Corby.

The modern facility is equipped with the latest technology to ensure that customers experience the highest standards to meet their unique requirements.

From the anechoic chambers through to the advanced testing facilities, nothing is left to chance in the comprehensive development programmes.

New Casino Range Product Launch at ICE2013

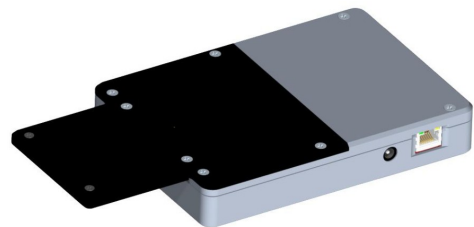

ExCeL, London • 5th - 7th February 2013

As technology becomes more sophisticated and cheaper, audio and video surveillance techniques are becoming a more prevalent threat in casinos worldwide. **Audiotel International** has established itself as a market leader in combatting technical advanced gaming threats and will be demonstrating our range of new and existing audio and video counter surveillance systems at **ICE 2013**. We welcome you to visit our stand **S6-572**.

The range of products includes our award winning **Casino Guard**, a surveillance system comprising multiple sensors that can be monitored from a central location capable of detecting radio signals including GSM, Wi-Fi, Bluetooth, 3G and 4G. We will also be demonstrating our new **Video Guard** system that detects and displays any wireless video being transmitted in the casino. In addition we will be previewing our **Casino Guard Lite** system, a technical advantage table protection system.

Casino Guard Lite is a revolution in countering technical advantage gaming. The system operates by scanning radio signals close to protected tables or gaming and public areas, giving 24/7 piece of mind.

As technology becomes more sophisticated and cheaper, video surveillance techniques are becoming a more prevalent threat in casinos worldwide. Video Guard is the first ever centralized, multi-sensor wireless video protection counter measure.

For more information on ICE 2013 and how to visit the exhibition, go to <http://www.icetotallygaming.com/> or contact Audiotel International direct.

Hope to see you at ICE 2013 - Stand S6-572

Artemis Advanced Our most powerful Non Linear Junction Detector

Artemis Advanced is Audiotel International's newest and most advanced Non Linear Junction Detector to date. Suitable for external or internal searching, this user configurable device will locate electronic, corrosive and metallic targets both buried and on the surface.

Integrating both NLJD technology and metal detection capability, the **Artemis Advanced** is able to quickly and accurately discriminate between malicious and naturally occurring targets. This coupled with the ability to pinpoint a threat even when it is turned off, makes it the ultimate search solution.

The **Artemis Advanced** is an essential search and locate NLJD

- Ideal for internal/external application
- Finds Electronic, Corrosive and Metallic threats
- Suitable for surface or buried targets
- High output power to increase target detection and penetration
- Detect electronic devices even if they are turned off
- Audio and/or visual warning of threats
- Easy to use for quick deployment
- Extendable search head reaches up to 1.4m
- Long battery life for efficient application

We will demonstrate the **Artemis Advanced** at all our exhibitions through 2013, check the website for further details. For more information on the **Artemis Advanced** contact our Sales team or visit www.audiotel-international.com
